

CHAPTER 4
ANTENNAS

Section

4-4-1	Definitions
4-4-2	Compliance Required
4-4-3	Location
4-4-4	Permit Required; Fees
4-4-5	Inspection
4-4-6	Construction Specifications
4-4-7	Electrical Requirements

§4-4-1: DEFINITIONS:

ANTENNA: A tower, dish or other device, any part of which is used for transmitting or receiving radio or television communications or signals. An antenna includes all appurtenant equipment, such as, but not limited to, control panels, wiring, mounting and base materials.
(Ord. 85-231, 6-17-1985)

§4-4-2: COMPLIANCE REQUIRED:

It shall be unlawful to construct, maintain, install or enlarge any antenna in the Village except in compliance with all the provisions of this Chapter. (Ord. 85-231, 6-17-1985)

§4-4-3: LOCATION:

The provisions of the zoning ordinance relative to structures shall apply to antennas. No portion of an antenna shall be located such that in the event of collapse or failure it will fall on abutting property. Antennas shall be installed behind the front line of any residential building located on the property. All dish type antennas shall be shielded from the public view. (Ord. 85-231, 6-17-1985)

§4-4-4: PERMIT REQUIRED; FEES:

Prior to the construction, installation, enlargement or alteration of any antenna, a permit shall be obtained from the Building Officer. Drawings and plans shall first be presented to the Building Officer for examination and approval, and each antenna shall be constructed in conformity with the approved plans. Preassembled mast antennas which weigh less than fifty (50) pounds shall be exempt from the permit application and fee requirements.

The fee for permit and inspection of construction shall be as specified from time to time in Section 4-1-5 of this Code.

(Ord. 85-231, 6-17-1985. amd. 2014 Code)

§4-4-5: INSPECTION:

The Building Inspector may periodically inspect all antennas to determine whether or not the provisions of this Code regarding health, welfare and safety applicable to antennas are being complied with. The fee for each inspection thereof shall be as specified from time to time in Section 4-1-5 of this Code. (Ord. 85-231, 6-17-1985, amd. 2014 Code)

§4-4-6: CONSTRUCTION SPECIFICATIONS:

- (A) Any tower or antenna containing exposed metal components greater than fifteen feet (15') in height shall contain an electrical ground.
- (B) Any dish type antenna of two feet (2') or less in diameter may be installed in view of public streets or other properties if erected on the roof of a building and provided that the highest point of such antenna does not exceed five feet (5') above the highest point of the roof on which such antenna is located.

(Ord. 85-231, 6-17-1985)

§4-4-7: ELECTRICAL REQUIREMENTS:

- (A) All electrical installations provided for, installed and used in conjunction with antennas shall be in conformance with the provisions of this Code regulating electrical installations.
- (B) No current carrying electrical conductors shall cross private residential antennas, either overhead or underground or within fifteen feet (15') of such antennas.
- (C) All enclosures or railings near or adjacent to antennas which might become electrically alive as a result of contact with broken overhead conductors or from any other cause, shall be effectively grounded.

(Ord. 85-231, 6-17-1985)
