

September 14, 2022

My name is Anthony (Tony) Cantieri

410 E. Lake Shore Drive

I have lived in tower lakes since May of 1987 (35 years)

My first involvement in Village Government was in 1992, I was appointed to an Ad Hoc committee to research elevated water towers because the Village of Tower lakes was going to purchase the Water Company. We recommended on ground water storage tank over an elevated water tanks so we could preserve the beauty of our natural landscape.

The Village of Tower Lakes has rejected Cell Towers from several cell phone companies because it was opposed by the majority of the residence and to protect our natural landscape.

The Village of Tower lakes Does NOT allow fences, storage sheds, and any detached structures so we can preserve the beauty of our natural landscape.

The Village has installed two Rain Gardens to control the drainage and to restrict contaminants from entering our lake. And to improve our natural landscape.

The beauty of our natural organic look of Tower lakes has been very important to everyone. I feel the approval of this Variance to allow a on Ground Solar Panel Structure will detract from our Natural Beautiful Landscape. It will also create a negative impact on the future development of Abbey Court Subdivision. You have a fiduciary responsibility to maintain and improve the Village of Tower lakes.

The Village allows the installations of solar panels on the roofs of their houses.

My only request is that you consider the beauty of our natural organic landscape of Tower Lakes while deliberating this variance.

Sincerely,

Anthony (Tony) Cantieri
